First Aid blanket **FOR BURNS**

Be prepared for burn injuries. Understand how important FOR BURNS gel, dressings and blankets are in the first aid of burn injuries. Anticipate the risk and let FOR BURNS be easy to reach.

FOR BURNS blankets are designed for first aid use on burn injuries, to slow/stop the burn progression and give pain relief. FOR BURNS blankets are constructed of foam blankets with a water-based gel for applying to the affected area. The gel effectively removes excess heat from the burn and reduces the risk of blistering. The cooling effect prevents the burn from going further down on the depth and perceived pain. Easy to use during transport.

100 x 100 cm	Art.No. 94381	1 pc packed in solid case Case measure: 385X135X250 Weight: 3700gr Quilted foam sheet 100 x 100 cm, strengthened with gauze and soaked with FOR BURNS gel
	EAN	7311410943812
